DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 82, 83, 111 and 112 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. With regards to claims 82 and 111, the applicant discloses "... this application does not explicitly disclose forming a polymer semiconducting layer on said substrate by ink jet printing" (See appendix B, page 1, Rational for Correspondence between claims of '196 patent and the claims in 09/901126). With regards to claim 83 and 112, the applicant discloses. " count 3 does not recite the forming of a gate insulator by ink jet printing" (See appendix B, page 2, Rational for Correspondence between the claims and the count).
